

SPACEKIM

WHITE PAPER

**"I will land on the moon and
replace a disgraceful rag of the
US flag with a glorious
ensign of DPRK!"**

Our Supreme Leader, Great Marshal and Beloved Father Kim Jong-Un had a heavenly epiphany that leapt from pages of original and brilliant book of Juche, and conceived a truly revolutionary idea. The idea which is simple but profound, concise but beautiful, earthly but cosmical – Korea should go to space.

OFFICIAL ANNOUNCEMENT

Presidential Secretariat of

Democratic People's Republic of Korea

Dear Comrades,

The never setting Sun of the Democratic People's Republic of Korea has been shining for 69 marvelous years radiating happiness and kindling hope in hearts of millions of people. Yet that is not the limit. The Great Nation of North Korea is ready to enter a new era and make our Sun brighter and stronger so it burns all Western imperialists to ashes. That is the era when DPRK commences the Glorious Expansion and ventures beyond the Earth in order to explore the eternity of space and settle planets, galaxies and, eventually the whole universe. I, the Great President of North Korea, take the honorable responsibility of becoming the Guiding Sun Ray who will lead the Nation through the velvety darkness of cosmos to new stars and vistas and spread the word of Juche and build the realm of Interstellar Socialism.

Today I am delighted to announce the launch of SpaceKIM - North Korean Space Project that will inevitably change the world beyond recognition. SpaceKIM Lunar mission will be the first milestone in North Korean cosmic crusade. I will land on the moon and replace the disgraceful rag of the US flag with a glorious ensign of DPRK!

Nevertheless, the night is young and we have a lot of hard work to do. We know that the revolutionary philosophy of Juche and infinite wisdom and legacy of the Great President Kim Il-Sung and Brilliant General Kim Jong-Il have copious rows of adherents all around the world. That is the crucial moment when we all ought to consolidate all our powers and efforts in order to lay the first stone in the fundament of SpaceKIM. Despite DPRK is encompassed by sanctions and blockades that inglorious Western cowards inflict upon us, we have found the most independent and efficient way of how you can aid our space program - SpaceKIM ICO.

*That will be one small step for your Brilliant Leader,
one giant leap for North Korea!*

16.01

Kim Jong-Un

*Sun of the Nation, Shining Star of Paektu Mountain, Symbol of the Fatherland's Unification,
Fate of the Nation, Invincible and Triumphant General, Ever-Victorious, Iron-Willed
Commander, World Leader of The 21st Century, Mastermind of the Revolution, Eternal
President and just Beloved Father, Who Descended From Heaven*

OVERVIEW

The **SpaceKIM** is the first North Korean ICO which goal is to sponsor the North Korean manned lunar mission and lay a foundation for further space exploration. The ICO is ERC-20-based. We are going to issue a total number of 37.9 million tokens which is equal to the total surface of the moon in square kilometers. As the result of the campaign an exclusive mobile app will be developed where all KIM token owners will be able to take part in In-App polls to influence key SpaceKIM decisions and claim their moon land ownership at a rate of 1 KIM token to 1 km².

ADVANTAGES

Stable, Innovative
and Reliable Blockchain
Product

the Greatest Leader
and Mastermind
of the 21st Century

Leads to the
victory of
Interstellar Socialism

Fully Juche-
compatible

ERC-20 Token

INITIAL COIN OFFERING

ICO Goals

Even though we have the greatest minds of scientists and engineers and abundant workpower of devoted and industrious Korean people at our disposal, we still need a substantial financial support in order to construct and launch Pulgasari-1 and keep the SpaceKIM Project afloat.

We expect our project to be appealing for all adherents of Juche and socialism and everyone taking interest in cosmos and annihilation of the omnipresent kraken of capitalism.

KIM token

KIM is an ERC-20 token. All KIM tokens will be issued by the Central Cryptobank of the Democratic People's Republic of Korea in exchange for ETH(Ethereum), BTC(Bitcoin), BCH(Bitcoin Cash) or LTC(Litecoin) during SpaceKIM crowdsale. Apart from being the first and the only cryptocurrency officially recognized by North Korea, KIM tokens also serve as vouchers of moon land ownership (1 KIM token = 1 km² of moon land). KIM tokens will be issued during the crowdsale period only and never after the end of the crowdsale.

ICO parameters

Name of the token: KIM

Issuance of KIM Tokens: 37 900 000

Token Exchange rate: 10 000 KIM = 1 ETH

Minimum transaction amount: 1 KIM

Bounty 1: 1 895 000 Tokens (5% of issuance)

Bounty 2: 1 895 000 Tokens (5% of issuance)

Pre-ICO Dates:

8 January 2018 12:00 UTC -

15 January 2018 12:00 UTC

Bonuses: in the pre-ico the participants will get a 50% tokens as a bonus

Tokens distributed through pre-ICO: 7 580 000

ICO Tier 1 Dates: 15 January 2018 12:01 UTC -

7 February 2018 12:00 UTC

Tokens distributed through ICO Tier 1: 13 265 000

ICO Tier 2 Dates: 9 February 2018 12:01 UTC -

25 February 2018 12:00 UTC

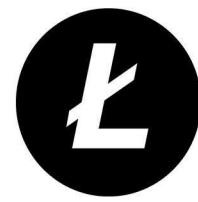

Tokens distributed through ICO Tier 2: 5 685 000

Token Distribution

Pre-ICO and ICO Tier 1 token distribution: from 7 February 2018 until 9 February

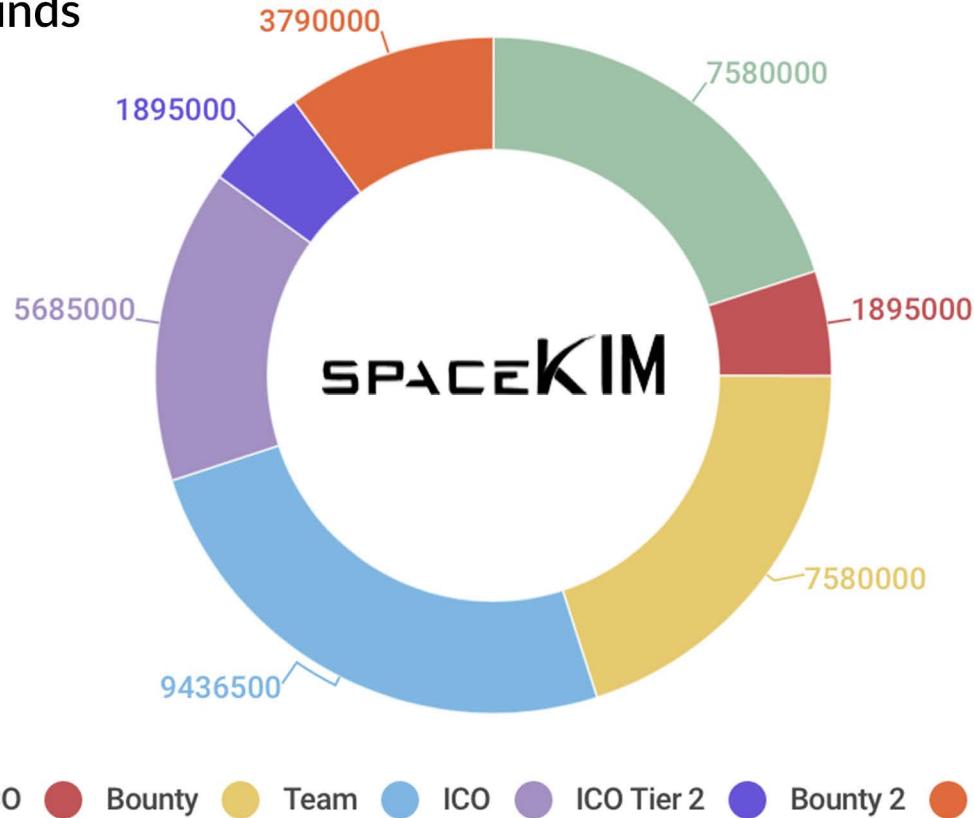

ICO Tier 2 token distribution: from 25 February 2018 until 2 March 2018

	1 ETH	1 BTC	1 BTH	1 LTC
Pre-ICO	15 000 KIM	300 000 KIM	45 000 KIM	3750 KIM
ICO	10 000 KIM	200 000 KIM	30 000 KIM	2500 KIM

Coin distribution

Trading KIM Tokens on Exchanges

Pulgasari-1 is not the only thing destined to fly to the moon as KIM Token is predetermined to rise in value exponentially as soon as the whole world acknowledges the glory of SpaceKIM and realizes how far ahead North Korea is in that race of scientific and spiritual progress. Therefore, we will do our best to list KIM on leading exchanges (evidently, top exchanges will be begging us for that).

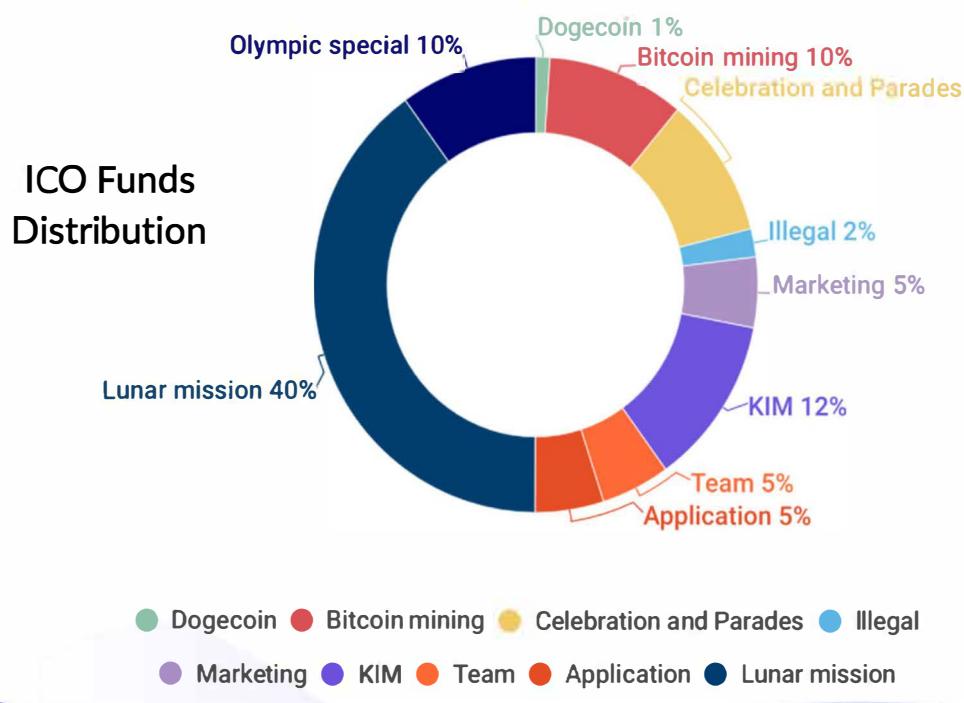

Bounty Program

Our Eternal President Kim Jong-Un, being an astute visionary and an excellent judge of character, realizes that apart from daily reading of Juche people still need some other little stimuli and incentives to stay motivated on the way to the imminent victory of Interstellar Socialism. Therefore, at his behest, SpaceKIM team has developed a variety of bounties for our most loyal and devoted supporters. These bounties include social media bounties, translation bounties, blog, podcast and video bounties, and BitcoinTalk.org signature bounties.

Of the total 37 900 000 KIM tokens,
10% will be used for bounty (5% for Bounty 1 and 5% for Bounty 2)
So a total of 3 790 000 KIM tokens will be used for bounty.

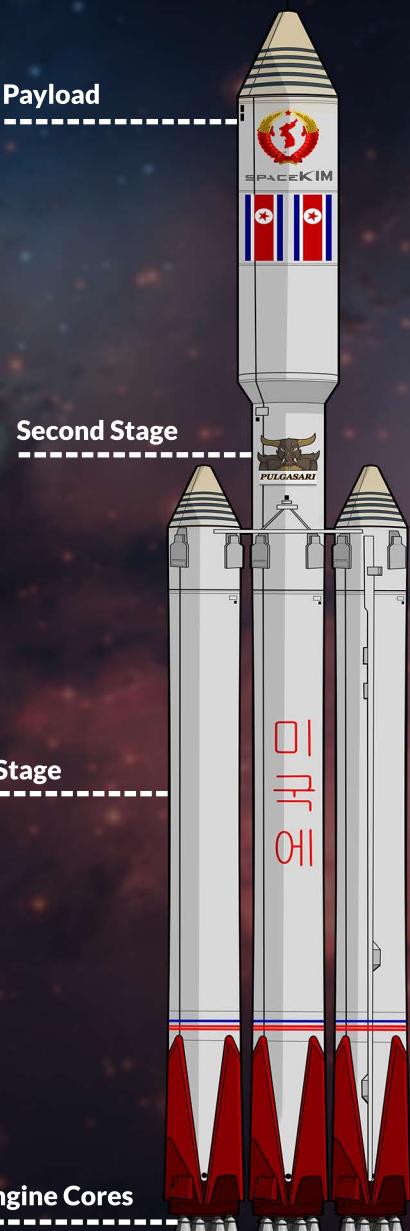

All SpaceKIM bounty payments will be made after the end of the SpaceKIM token crowdsale.

Detailed bounty program can be found here: [LINK \(clickable\)](#)

PULGASARI-1

Pulgasari-1 is a jewel in the crown of North Korean space engineering that is destined to become the first human-carrying spaceship in our nation's history. Pulgasari-1 is a fully reusable thermonuclear powered heavy-lift launch vehicle designed and constructed specially for ultrafast and supercomfortable round trip lunar missions that makes it like Uber for space trips. Most importantly, Pulgasari-1's spearhead is as sharp as Kim Jong-Un's mind so it dissects the thickness of space, thus decentralizing it.

Payload

Payload is the arrowhead and the core element of Pulgasari-1 where the most precious and important elements are located. From bottom to top payload includes: HODL - the bitcoin mining satellite, Lunar Module, Service and Recreation Module (space basketball room, Brilliant Leader Kim Jong Un's room, Crew Room and Warehouse) and Command Module. Payload's ultra innovative fairing is a feather in North Korean agrarians' and engineers' cap as it is comprised of a unique composite rice powder manufactured of a top-secret sort of cultivated rice that grows on Hamhung valleys. It makes the shell very durable and fireproof and multi-purposeful as it is not only protective but also edible and can be partly consumed by the crew in force majeure situations (which are very unlikely to happen though).

Second Stage

The second stage, powered by a triple Wildfire nuclear thermal engine, delivers Pulgasari's payload to the desired orbit. The second stage engines ignite a few seconds after stage separation, and can be restarted multiple times to place multiple payloads into different orbits. For maximum reliability, the second stage has redundant igniter systems. Like the first stage, the second stage is made from a high-strength aluminum-kimium alloy.

First Stage

Three cores representing three Beloved Fathers of North Korea Kim Il-Sung, Kim Jong-Il and Kim Jong-Un make up the first stage of Pulgasari-1. The side cores, or holy boosters, are connected at the base and at the top of the center core's liquid hydrogen tank. The three cores, with a total of 27 Wildfire engines, generate 66,666 kilonewtons (14.98 million pounds) of thrust at liftoff. Shortly after the liftoff the center core engines are throttle down. After the side cores separate , the center core engines throttle back up to the full thrust.

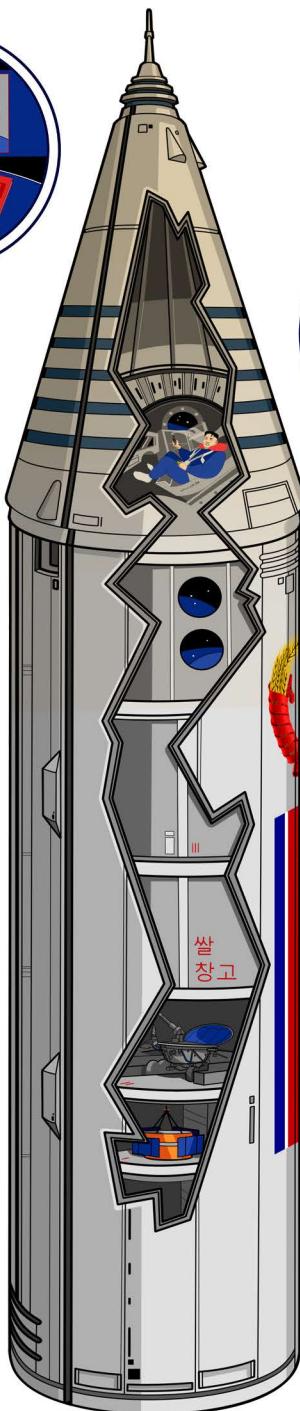

Three Nine-Engine Cores

Inside each of Pulgasari-1's three cores is a cluster of nine Wildfire engines. These engines enable efficiencies that make Falcon Heavy the most cost-effective heavy-lift launch vehicle in the world. The Wildfire engine is the latest invention of North Korean ingenious engineers that is based on nuclear thermal technology. The engine is named after an eponymous top-secret active liquid used as working fluid which provides unparalleled level of thrust. Wildfire engines are well-known in DPRK for their emerald green hues while ablaze.

PAYOUT

The Capsule of Truth

Our Great Man, Who Descended From Heaven Kim Jong Un has no doubts in the existence of interterrestrial civilizations. Sooner or later North Korea is bound to encounter them. The smartest will fathom the absolute truth of Juche and pledge their loyalty to DPRK and Interstellar Socialism. And the vile and ignorant will either be made to bend their knee (or any other form of limb) by force or wiped out of their existence forever. For the time being, we believe our duty is to prepare alien civilizations for DPRK arrival and inform them of socialism values and the word of Juche. Thereby, we are going to translate the Revolutionary book of Juche into every existing Earth language including coding languages (except Java) in a printed, digital and audio format and enclose them in the Capsule of Truth along with the portraits of our Beloved Fathers of the Nation Kim Il-Seng and Kim Il-Sung and recordings of their godlike voices. The Capsule of Truth will become the seed that Our Savior Kim Jong-Un plants in the womb of Universe whereby conceiving a child of Brave New World!

Kim Jong-Un's Chambers

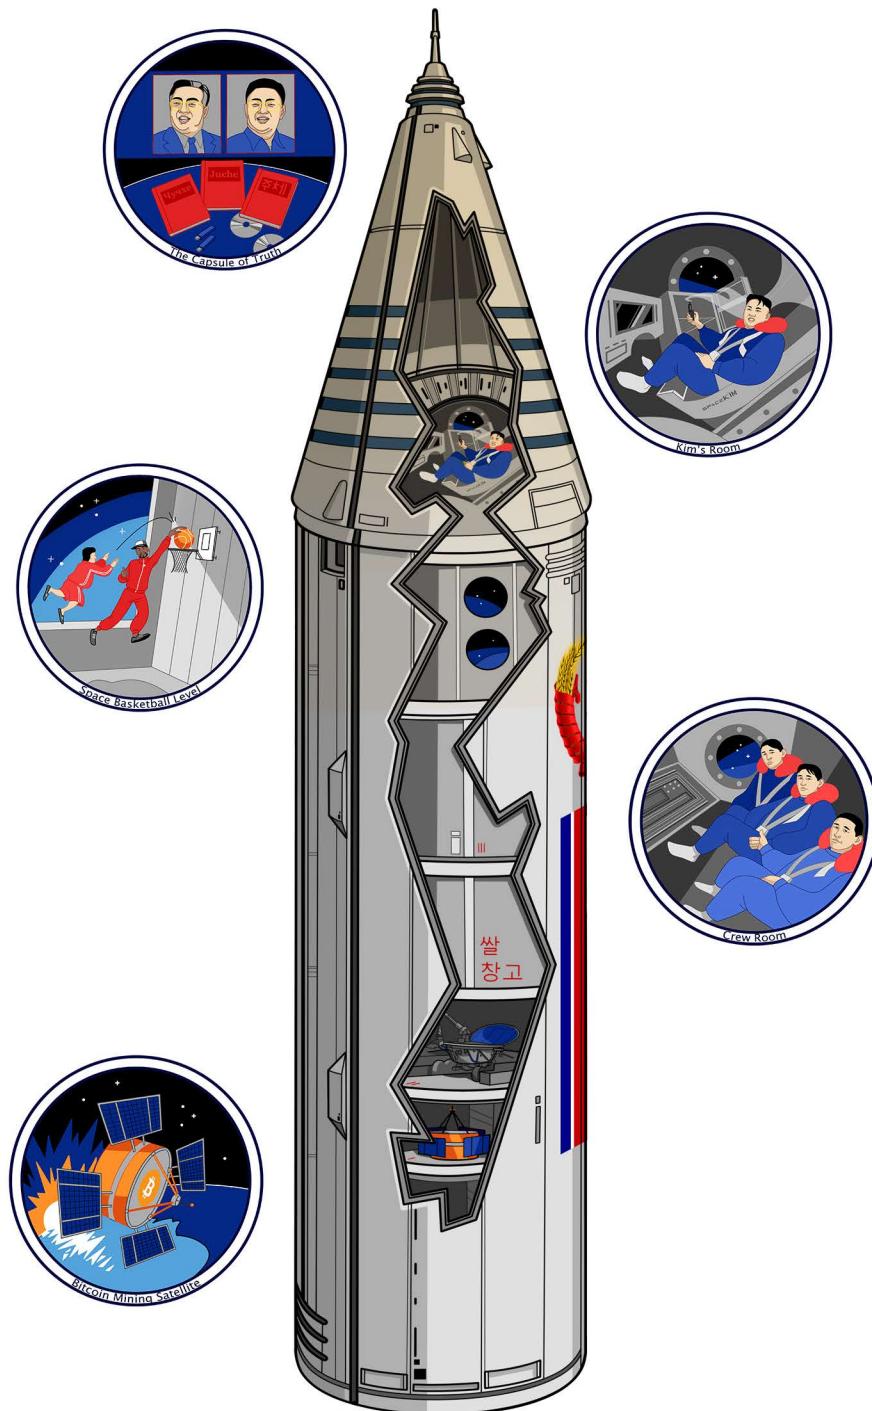

Every visionary and mastermind, who the Messiah of Juche Kim Jong-Un doubtlessly is, requires comfortable and pleasant environment that facilitates thinking process. It is exceptionally important to register and document each and every wisdom that comes to our Leader's mind, especially, during the upcoming lunar trip as the atmosphere of space is guaranteed to bring a lot of unearthly revelations. That is why Pulgasari-1 is equipped with special spacious and cosy chambers for our Beloved Leader. The room will be provided with such amenities as widescreen TV set, fridge, mini bar, PS4 with NBA 2K preinstalled and full edition of Kim Il-Sung's and Kim Jong-Il's monographs in various fonts and sizes.

Crew room

Korean socialism is built upon values of equality and fraternity which we laboriously nurture in every citizen from the cradle. Thus, whole SpaceKIM crew will reside in a single ascetically designed room with a basic level of comfort, so they would bond closer together and exercise humility.

PAYOUT

HODL - Bitcoin Mining Satellite

We, North Koreans, are very thrifty and forward-thinking people. Our intention is not only to spend ICO fund on space missions, but also to multiply this capital through wise investment. That is why Pulgasari-1 is equipped with a whole bitcoin and ethereum mining satellite which will be sent into Earth's orbit on Pulgasari-1's way to the moon. The satellite is mounted with innovative high-performance solar panels which are capable of generating enough energy to power the mining farm making it extremely cost-efficient. According to our leading economists, Pulgasari-1 is going to pay for itself after HODL's 6 months on orbit. We will make money out of thin air in places where air is, indeed, extremely thin. Isn't it the evidence of our Dear Father's absolute erudition and acumen?

Space basketball room

In Democratic People's Republic of Korea we pay a lot of attention to well-being of our people unlike greedy Americans and their allies. People are always first. The round trip to the Moon will take approximately one week during which it is essential to stay physically active and entertained. Consequently, at the order of MVP (Most Valuable President) Kim Jong-Un, we equipped our rocket with a Space Basketball room that is the first zero gravity basketball facility ever.

Space Food

North Korea is worldwide famous for its unique and delicious cuisine with its diversity and abundance. Our food engineers are working shoulder to shoulder with country's best culinary experts in order to develop the most nutritious and palatable space ration for our brave astronauts. The current preliminary menu includes canned kimchi, liquidized rice in tubes and special space edition of legendary Koryo burger.

WHAT YOU GET IN RETURN?

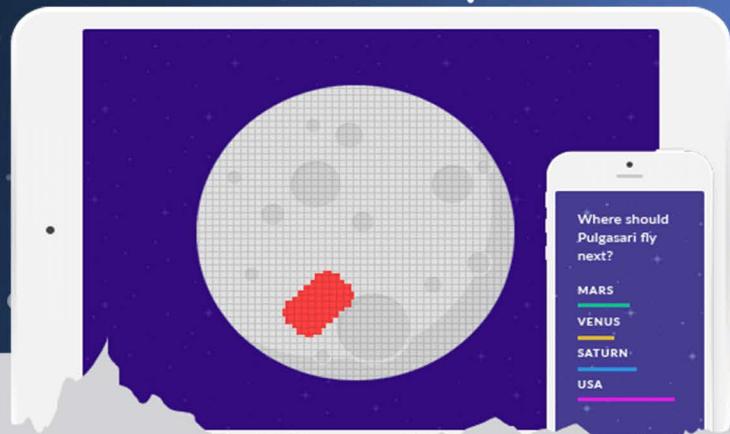

YOUR LIFE

SPACEKIM MOBILE APP

MOON LAND OWNERSHIP
RIGHTS

In 2018 we are going to release an official SpaceKIM mobile app on both Android and iOS. The app platform will include In-App voting platform and, most importantly, moon land distribution system. The leading North Korean developers and software engineers will be toiling over development of groundbreaking decentralized blockchain-based SpaceKIM app. The SpaceKIM app will be underpinned by unique Hybrid Intelligence that guarantees maximally accurate, fair and orthodox voting and land distribution.

Hybrid Intelligence

Hybrid Intelligence is an extremely powerful combination of Juche-based artificial intelligence (Juche AI) with absolutely natural and palpable intelligence of Mastermind of the Revolution Kim Jong-Un - a truly godlike amalgam.

In-App Voting

Democracy is not an empty word for our Notable Nation, it is embedded in our People's Republic's name proudly entitling it Democratic. We always put the people first and try to always give them the right to choose and make their voice heard on the way to the Great Juche Revolution. SpaceKIM Project is not an exception. That is why every holder of KIM tokens will be able to influence every key decision throughout our space program via a special In-App voting platform. The voting power of each contributor will depend on the input he made to the success of SpaceKIM. In other words, the more tokens you have, the heavier your vote is. Simple and fair proportion. 1 token is equal to 1 vote. The total amount of votes is 37.9M: 30.32M belongs to investors, 7.58M belongs to SpaceKIM team*.

**The final decision still depends on the will of the Wisest of Living Presidents Kim Jong Un*

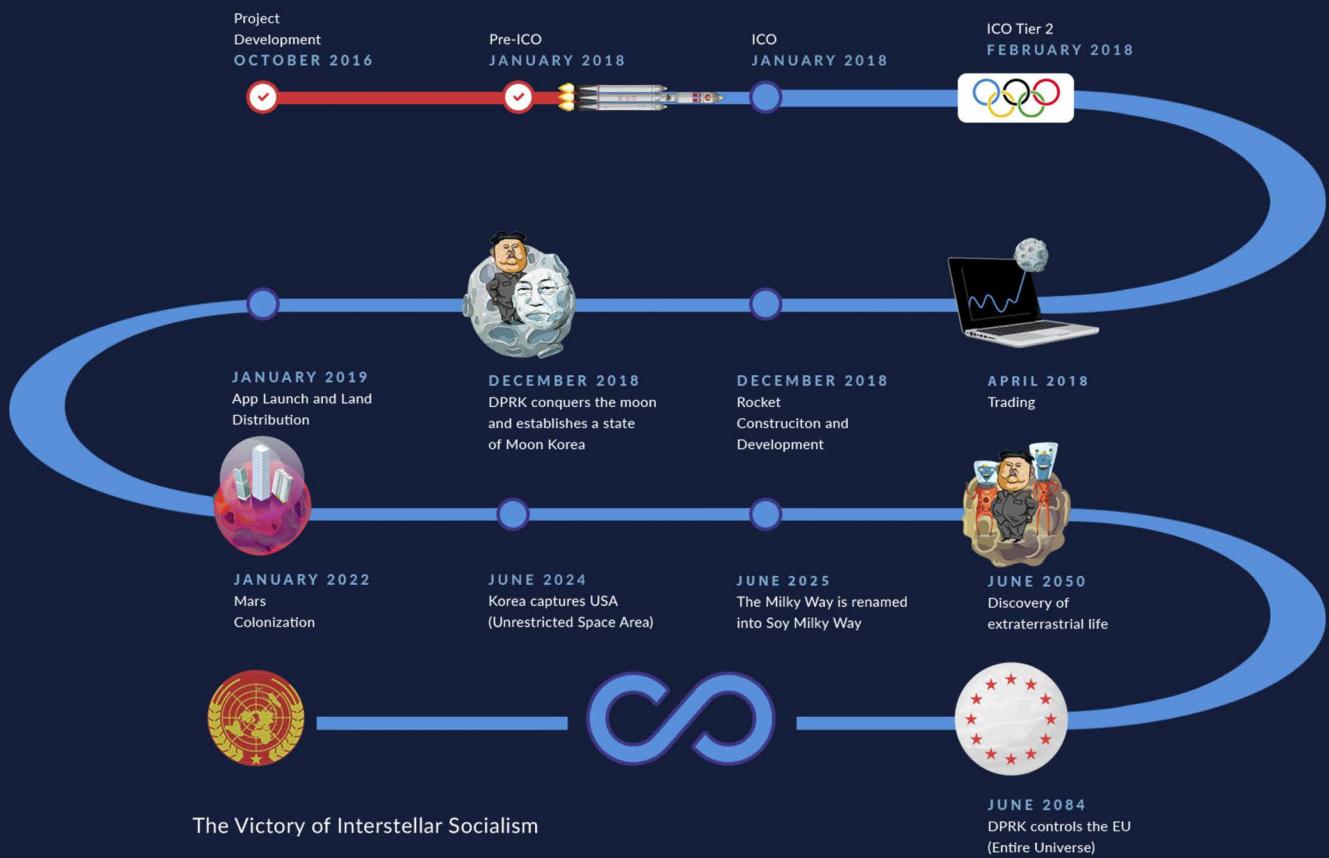

Moonland distribution

"North Koreans always pay their debts". The major goal of SpaceKIM mission is to conquer the moon and proclaim the state of Moon Korea. Doubtlessly, we will reward all contributors for their generous help. Therefore, every owner of KIM tokens will be entitled to get a piece of moon land accordingly to the amount of tokens he possesses.

As soon as SpaceKIM ICO is over, the whole moon's **surface of 37,900,000 square kilometers** will be divided by the total amount of tokens issued. After that every token owner will be able to book a moon land proportionate to his KIM token holdings and receive an **Official Certificate of Ownership** signed by Kim Jong Un's salutary hand.

ROADMAP

TEAM

**Kim Jong-Un,
CEO, Rocket Man**

Sun of the Nation, Eternal President of North Korea. Aspiring Cosmonaut and the creator of Interstellar Socialism. Loves cheese, basketball, rockets and his Homeland.

**Kim Jong-Il,
Ex-CEO**

Beloved Father of Kim Jong-Un, The Dear Leader of North Korea. Bravely protected the Nation from sly Western imperialists and pulled the country out of famine. Loved cinematography, stylish eyeglass frames, khaki overalls and his Homeland.

**Kim Il-Sung,
Ex-Ex-CEO**

Beloved Father of Kim Jong-Il and Grandfather of Kim Jong-Un. Founder of DPRK and author of original, brilliant and revolutionary philosophy of Juche. Courageously defeated South Korean and US forces during Korean War. Loved socialism, looking good, fish and his Homeland.

**But Err-Inh,
Blockchain Expert**

Creator of Ricereum, a rice-based blockchain platform which revolutionized North Korean planned economy and food industry. Err-Inh is considered to be the most prodigious millennial in DPRK. Loves math, fancy t-shirts, censorship and his Homeland.

**Il-Ung Masg,
Chief Engineer**

The best engineer in North Korea, inventor of Wildfire engine. Il-Ung's enterprise Paektusla has recently received the biggest in DPRK history state grant for development of Wildfire-powered convertibles for Workers' Party establishment. Loves artificial intelligence, subsidies, maracas and his Homeland.

**Dennis Rodman,
Foreign Ambassador**

Basketball Legend and good friend of Kim Jong-Un. The only person who is capable to compete with Kim Jong-Un in basketball. Loves colorful hairstyles, piercing, PotCoin and North Korea.

**Hyon Kwang-Il,
Head of NADA**

Hardworking and docile head of National Aerospace Development Administration. Kwang-Il has made a meteorical career from an ordinary intern to a head of NADA. Also, he can sleep standing up. Loves kimchi, birdwatching, stand-up and his Homeland.

THE LAST WORDS FROM THE GREATEST LEADER

The day was fresh, the night was young
When marvel happened in Pyongyang.
Being an apt and avid reader,
Studied Juche the Nation's Leader.
He's searching for a smart solution
To feed his folk and spark the Holy Revolution,
To make all equal, live in harmony and peace.
He groped for a window sash to let in midnight breeze.
The sash slid up, Kim raised his brow
The room got lit by funny glow
This wheel of cheese that shone right in the middle
Was cherished answer for the Leader's riddle
Kim flung hands up astonished by the boon
And then exclaimed he:
"Eureka! Korea has to go to the moon!"

The holy cry reached acute ears
Of scientists and engineers
The greatest minds gathered together,
Despite all chores and nippy weather
They buckled down, fused manship and ken,
In order to devise a breakthrough plan
The fruit was sweet, though very hard to reap,
Great minds invented startling rocket ship

Spellbinders swiftly grasped the yolk
And spread ideas to the common folk
Many a little makes a mickle
Folk offered their aid — hammer and sickle
With valour, diligence and no hurry
Koreans built a beast called Pulgasari

The zero hour has come,
Engines play symphonies of hum
Brave crew is ready for the start
Soon Homeland will be apart
And solemn Leader Kim Jong-un
Is counting down till the noon
It's 3, 2, 1 and very soon

These daring men will walk the moon!
